

Here at Common Park Dental, our #1 priority is the safety and well-being of our patients.

In accordance with CDC, ADA, and federal guidelines, we are excited to announce that it had been deemed safe to reopen as of **Tuesday, May 26th**.

We have made specialized efforts and introduced added precautionary measures to ensure a clean and sanitized dental practice during the current COVID-19 crisis. Our office has **passed the eAssist COVID-19 Cleanliness Certification Test**. You will see these changes on your next visit.

New COVID-19 Safety Measures

- **We have taken measures to enhance our already meticulous disinfection methods.** Our staff take pride in the cleanliness and sanitation of our practice. We have furthered our precautions by increasing the frequency of our sanitization procedures within the facility, continuously cleaning throughout the day. Hand sanitizer will be readily available to help protect our patients. We have medical filtration systems in all operatories and waiting rooms as well as high velocity extra oral suctions for any procedures that produce aerosols
- **We are conducting pre-visit screenings** for all our patients and staff daily (temperature and symptom checks). If you have a fever, cough, shortness of breath, or other COVID-19 symptoms you will be asked to reschedule. Any patient or staff who were diagnosed with COVID-19 must have an all-clear from their physician before entering our facility.
- **Our staff is trained on proper PPE use.** We employ the most up-to-date Personal Protective Equipment (PPE) including masks, gloves, face shields, and gowns.
- **Our waiting room space is limited.** In an effort to maintain safe social distancing guidelines, patients are urged to wait in their cars. Patients, please arrive 10-minutes early to inform the front desk of your arrival by calling or texting our phone and wait in your parked car or outdoors until our staff calls you in.
- **We are limiting the number of patients we see at any given time and added extra time between appointments** to allow for safe social distancing, proper ventilation, and sanitation. **Only patients, or patients plus one critical caregiver,** are allowed into an appointment. Our office is closed to all people except patients and healthcare workers.
- **We kindly request that *all* our patients wear a face covering and wash their hands** prior to entering the facility.

- **Patients may be asked to use an antiseptic oral rinse** (diluted peroxide, chlorhexidine, others) pre-procedure.

As always, our main concern is the safety and well-being of our patients and staff. If you have any questions or concerns, do not hesitate to contact us at (508) 926-8633.

Thank you & we look forward to seeing you soon!
